

CORYDALIS

'BLUE LINE'

METALLIC BLUE FLOWERS

A woodland treasure! Brighten up shady spots in the garden with iridescent blue flowers that are hardy and easy to grow. Well suited to cool spots under larger trees and shrubs, 'Blue Line' will gradually creep across the ground creating a colourful carpet of blue, reminiscent of a woodland glade.

FEATURES

- A long and prolific display of spur-shape, metallic blue flowers produced from spring through autumn
- Ornamental, soft fern-like foliage
- Ideal for bright colour in low light areas

USES

- Ideal for contemporary container displays
- Planting around shaded pathways, water features and ponds
- Small or narrow spaces

CARE

For optimum results plant in a moist but well drained soil. Mulch well to help retain moisture and apply a slow release fertiliser in spring. Protect from hot afternoon sun. Pruning not generally require other than to tidy if needed.

ORIGIN: France // **SPECIES:** hybrid // **PROTECTION STATUS:** PBR Protectable
