

DAPHNE X TRANSATLANTICA

'SPRING PINK ETERNAL FRAGRANCE' [Ⓟ]

STRONGLY PERFUMED

REPEAT FLOWERING

SUN HARDY

A must have plant! 'Spring Pink Eternal Fragrance' is the sister plant to the very famous and renowned white flowering, Daphne 'Eternal Fragrance'. Flushes of the sweetly fragrant Pink flowers on the deep green foliage appear in Late Winter/ Early spring each year. Then repeating again in early summer and again in Autumn with darker pink buds fading to lighter pink tones. Unlike other Daphnes, 'Spring Pink Eternal Fragrance' will thrive in a full sun position but will also perform in semi shade. A truly outstanding garden and pot performer.

FULL SUN

PART SHADE

FROST HARDY

DRY TOLERANT

HEIGHT 60CM
SPREAD 90CM

FEATURES

- Exquisite fragrance
- Repeat flowering - Initially Spring Pink's flowers are a deep pink. Then throughout the year flowers fade from pink to pale pink to almost white in summer.
- Frost hardy. Heat and dry tolerant – performs in sunny sites without scorching

USES

- Stunning low perfumed hedge or border
- Small gardens, patios and courtyards
- Containers
- Underplant beneath open tree canopies

CARE

Low water requirements. Once established requires only occasional deep watering during periods of extended heat. Plant in a well-drained position, which is critical for success with any Daphne. For optimum results, lightly trim and feed with a slow release fertiliser in summer to maintain shape and vigor. Tolerant of both acid and alkaline soil types.

ORIGIN: United Kingdom // **SPECIES:** *Transatlantica* // **PROTECTION STATUS:** PBR Protected
