

# Leptospermum 'Fore Shore'<sup>®</sup>

## ULTIMATE NATIVE HEDGE

**Origin:** Mt Gambier, South Australia

**Species:** *Leptospermum laevigatum*

**Protection Status:** PBR protected

Full sun/part shade

Height 50cm

Spread 50cm

Space 30cm apart

## Features:

- Versatile landscape performer
- Outstanding resilience to the harshest coastal conditions
- Tolerates salt sprays and salt laden winds
- Stand out grey/green foliage with bronze coloured new growth
- Very hardy, drought tolerant, low water user
- Easy to grow with minimal maintenance
- Frost hardy

## Suggested Uses:

- Low hedging and borders
- Difficult sites such as: coastal plantings, road sides, parks and other public spaces
- Ideal for filling narrow or small spaces
- Small gardens, patios and courtyards
- Poolside landscapes
- Responds well to clipping for topiary applications

## Water Requirements:

Low. Once established it is reasonably dry tolerant requiring only occasional deep watering during extended periods of heat.

## Care:

Plant in most soil types that are well draining. Best grown in full sun but will tolerate part shade. Lightly trim to maintain shape – but not essential.
