

AGAPANTHUS

# 'BABY PETE' ♂

DWARF, COMPACT HABIT

'Baby Pete' is one of Australia's superior dwarf forms of Agapanthus. Famed for its compact nature and hardy garden performance, 'Baby Pete' is the perfect choice for low borders and edging. Throughout the warmer months it puts on a lasting, colourful show of blue flowers. In full flower 'Baby Pete' extends to a maximum height of 40-45cm, with a foliage height of just 20cm. After years of testing across the globe, no viable seed has been observed.

## FEATURES

- Dwarf variety with compact mound forming foliage
- Long flowering - throughout warmer months
- Low seeding during trials
- Evergreen and hardy, without any special needs
- Very dry tolerant once established
- Bred in Australia

## USES

- Year round interest from foliage
- Edging paths, drives and other paved surfaces
- Hardy for commercial landscaping or public spaces
- Container displays for hot, sunny locations
- Small gardens, patios and courtyards
- Coastal Dry or gravel style gardens

## CARE

Easy to grow in most soil types which are well draining. Apply a slow release fertiliser in spring, no pruning required although removing spent flowering stems will encourage further flushes.

**ORIGIN:** Brisbane, Australia // **SPECIES:** *Agapanthus praecox* spp. *orientalis* // **PROTECTION STATUS:** PBR Protected
