

CONVOLVULUS

# 'LILAC MOON'

CHEERY GROUND COVER

Not only is this sun-tough ground cover a mass of bee-attracting lilac flowers, but it also doubles as a living mulch that keeps the ground cool and out-competes the weeds. Watch the cool coloured flowers furl and unfurl with as the sun rises and sets each day, a display that just keeps on coming so you get real garden impact from October to February.

## FEATURES

- Delightful lilac blooms over the warmer months
- Ornamental ground cover
- Low maintenance and easy to grow

## USES

- Cascade over rocks and walls
- Embankments and retaining walls
- Containers and hanging baskets
- Weed suppressant

## CARE

Low water requirements once established. Provide an occasional deep watering during periods of extended heat. Grows well in most soils that are well draining. Feed with a slow release fertiliser in spring for optimum results.
