

CONOSTYLIS

# 'SILVERSUNRISE'

SUN-TOUGH SILVER FOLIAGE

*Conostylis 'Silversunrise' is a grass-like Australian native ground cover with ghostly grey leaves that make a real statement. With golden button-like flowers that appear in spring and continue through into summer, it makes the perfect dry-garden companion for dark-leaved grasses and ground covers. 'Silversunrise' is a real garden feature when planted singly or in a pot, and a real show-stopper when planted en-masse creating a drift of colour.*

## FEATURES

- Soft and silvery foliage
- Subtle and long-lasting display of yellow 'button' flowers
- Compact and tidy plant that requires no pruning

## USES

- Path edges and borders
- Groundcover, perfect with Australian natives and dry garden plantings
- Ideal for low-maintenance window boxes
- Fantastic plants for coastal and inland drought-proof gardens

## CARE

For optimum results plant in a well drained soil, in a sunny location. Feed in early spring with a fertiliser formulated for natives and remove spent flower heads to encourage more flowers.
