

GREVILLEA

'WINTER DELIGHT'

COLOURFUL FOLIAGE

Grevillea 'Winter Delight', is as the name suggests, at its very best during the winter months. 'Winter Delight' is a low mounding shrub or ground cover, with soft grey foliage and will reward you with a profusion of reddish pink and cream flowers from mid winter right through to early spring. This variety is a real show stopper when in full flower.

FEATURES

- A beautiful low shrub with soft grey foliage and profuse red-pink and cream flowers
- Dense habit
- Excellent refuge and food source for native birds
- Very hardy and low maintenance

USES

- Bright colour for the winter months
- Striking garden shrub
- Rockeries, containers, general landscaping
- Coastal plantings

CARE

Very low water requirements once established. Quite dry tolerant. Extremely hardy in most soil types which are well draining. For optimum results use a fertiliser formulated for natives.
