

HELLEBORUS

'ANNA'S RED'

REGAL BLOOMS

Anna's Red is an absolute breakthrough variety with outstanding performance. Stunning red to burgundy flowers appear from early winter through until early spring each year. The flower stems grow through the foliage to make a dramatic impact above the lush dark green, tough leathery foliage. This will be a talking point in your winter garden. Performs well in either a decorative container or gardens large and small. Enjoy indoors, either as cut flowers in a vase or as a potted plant for up to 3 weeks before planting in the garden.*

FEATURES & USES

- Elegant and upright blooms in deep magenta
- Vigorous grower with a tidy habit
- Gorgeous results for shady nooks
- Eye catching colour for the cooler months
- Elegant solutions for shady nooks
- Beautiful container displays

**Performance indoors will vary due to conditions within each environment.*

ORIGIN: Netherlands // **SPECIES:** *Helleborus hybrid* // **PROTECTION STATUS:** PBR Protected

CARE

Water requirements are medium once established. Will benefit from an occasional deep soak during periods of extended heat. If growing in containers, care should be taken not to allow to dry out completely. Plant in a well-draining potting media in pots or in an enriched soil in the garden. Tidy after flowering by removing old flower heads. For best results, feed in late autumn and spring with a slow release fertiliser. **CAUTION:** Harmful if eaten/skin irritant
