

HYDRANGEA

'MAGICAL RUBYRED'

DARKEST RED WITHIN
THE MAGICAL SERIES

“One of the most outstanding red coloured Hydrangea available anywhere! 'Magical Rubyred' blooms appear in October and can flower through to January, depending on location and climate.”

'Magical Rubyred' flower performance is stunning. Deep ruby red petals are complemented with feature dark green leaves which are nearly black when they emerge, and offer a lovely backdrop for the durable, repeat-flowering blooms.

As the blooms age, they fade to a deeper, dusky aged shiraz colour. These combinations make 'Magical Rubyred' a stand out against other forms and colours of it's type.

'Magical Rubyred' is another ground breaking result from one of the world leaders in Hydrangea breeding, the highly respected, Kolsters BV.

ORIGIN: Netherlands // **SPECIES:** *Hydrangea macrophylla* // **PROTECTION STATUS:** PBR Protected
