

HYDRANGEA

'MAGICAL PEARL'

STUNNING WHITE FLOWER

'Magical Pearl' is a stunning clear white flower held on strong stems over deep green foliage. After a few weeks from the peak of flowering, the white ages to a chartreuse green that looks great in bouquets or as dried flowers. Flowers are formed on both old and new wood, so pruning shouldn't be done unless necessary. With that said, the white flowers can be pruned at any time to make way for fresh new flower stems.

FEATURES

- Stunning clear white flowers that age to chartreuse green
- Flower display from summer into autumn
- Easy to grow with minimal maintenance

USES

- Large containers or tubs
- Colour for shady entertainment areas
- Formal and classic gardens
- Stunning when used as cut flowers, both fresh and dried

CARE

If pruning is required, do this in late summer just after they've finished flowering. Best grown in part-sun and afternoon shade in moist well-drained soil, applying mulch to conserve moisture throughout the summer months. Apply a controlled-release fertilizer in early spring to encourage healthy plant vigour and look.

CAUTION: Harmful if eaten/skin & eye irritant

ORIGIN: Europe // **SPECIES:** *Hydrangea macrophylla* 'Napo'
