

HYDRANGEA

OBSIDIAN COLLECTION

STUNNING BLACK STEMS

'STORM CLOUD'

Blue or mauve mop top variety with large flower heads

'BLACK LACE'

Lace cap variety with pink, blue or mauve flowers

'WHITE KNIGHT'

White mop top flower heads with vibrant dark green foliage

The Obsidian Collection includes stunning varieties of Hydrangeas with beautiful dark stems. The unusual black stem colour provides a unique floral display in the garden. Enjoy these amazing blooms in summer and autumn in the garden or as cut flowers. These spectacular and showy garden plants will reward you with gorgeous displays of blooms set against fresh green foliage.

FEATURES

- A vigorous growing hydrangea variety with stunning, long, black stems
- Flower display begins in late spring
- Frost hardy but can also withstand high temperatures
- Easy to grow with minimal maintenance

USES

- Containers or tubs
- Small gardens, patios or courtyards
- Colour for shady entertainment areas
- Stems provide a contrasting effect in a winter garden
- Stems also add an extra element of interest when used as a cut flower

CARE

Medium water requirements. Once established, quite dry tolerant requiring only occasional deep watering during periods of heat. Plant in most soil types that are well draining. Prune back to plump set of buds during winter. Feed in early spring with a slow release fertiliser for best results Fertilise more often if grown in containers, according to manufacturers recommendations. The colour of some hydrangeas can be controlled by soil pH.

CAUTION: Harmful if eaten/skin & eye irritant

SPECIES: *Hydrangea macrophylla*
