

MAGNOLIA

'GENIE' 

SPECTACULAR ELEGANCE

Magnolia 'Genie' is an incredibly compact small tree, with stunning deep burgundy blooms. Magnolia 'Genie' is famed for its spectacular flowers which adorn the plant in late winter and early spring and again in autumn. The deep coloured buds are striking in themselves and once they open to the goblet-shaped blooms you will experience 'Genie's' true magic for yourself.

FEATURES

- Spectacular large, deep burgundy flowers
- Incredible black-red tulip-like buds
- Hardy, flowers having remarkable frost resistance
- Dwarf, columnar form

USES

- A magnificent feature plant
- Great in large containers
- Perfect for areas where space is limited

CARE

Low water requirements. Prefers a deep, freely draining rich soil. Plant in a well composted soil. Mulch well to provide a cool root zone and keep the root ball moist during the first season. Prune after flowering if desired.
