

PIERIS

KATSURA

STUNNING FOLIAGE DISPLAY

Thriving in gardens that experience true winter cold, a tough evergreen shrub that is as beautiful as it is hardy. In spring deep pink buds open to two-toned pale pink bell-shaped flowers that sit well above the glossy green leaves. The show continues with the new leaves emerging in as entirely red, aging to deep green over the summer.

FEATURES

- Beautiful rich leaves that are a unique deep red in spring and then age to a glossy green
- Elegant rose-coloured flowers cascade over the foliage in spring
- A low maintenance bushy and upright shrub

USES

- Perfect for containers
- Informal borders
- Great colour accent to mixed garden beds
- Stunning addition to a Japanese themed garden

CARE

Medium water requirements. Does best in a moist but well drained soil. For optimum results, plant in a fertile soil. Prefers a semi-shade position and protect from frosts until established. Feed in spring with a slow release fertiliser. Prune to shape if desired.
