

SYZYGium

'BIG RED'

COLOUR FOR HEDGING

This outstanding form of Lilly Pilly has been selected for its superior qualities, easy to grow nature and has 10 years of proven success. 'Big Red' is a versatile plant making it the perfect hedging or screen plant for many applications including trimmed into different shapes with its easy to prune nature. Famed for its stunning dark green evergreen foliage it is highlighted with rich burgundy growth in spring and again in autumn, with an explosion of stunning white flowers in summer.

FEATURES

- Outstanding medium growing Lillypilly
- Large, glossy leaves
- New growth is one of the darkest crimson foliages available
- White flowers borne over summer are followed by edible berries
- Berries attract native birds
- Hardy and dry tolerant
- Responds well to shaping

USES

- Screening or hedging
- Topiary specimen in gardens or large tubs
- Low water gardens
- Low maintenance areas
- Small gardens
- Native gardens
- Coastal regions

CARE

Low water requirements once established. Quite dry tolerant requiring only an occasional long soak during extended periods of heat. Grows well in most soil types which are well draining. Prune to shape during early spring to encourage dense habit. Use a fertiliser formulated for natives according to manufacturers directions.
